Currently

Figuring out how Quarto works

Specialized in

Software Architecture, Data Analysis, and implementation of Sentiment Analysis ML models

Research interests

AI, CI/CD pipelines, automated tasks using bash, micro-services, and game modding

Education

2020 **Lone Peak High School Graduate**

2023 - 2026 **Brigham Young University Idaho**

- Graduated in Software Engineering with a Software Architecture and Data Science Certificate

Profeciencies

- Python
- C++
- C#
- Google Cloud and AWS
- Bash
- Hugging Face
- Ollama
- Git

Internships

Summer 2024 Studied AI implementation in reading documentation, sentiment analysis, and learned simple full stack development principles.

Summer 2025 Researched and prototyped a ML alternative for a service provided by the product. Learned how to present in a convincing way, and worked on front end and backend tickets.

Employment History

Fall 2024 - Winter 2025 Data Entry Clerk, BYU Idaho Alumni Office

- Figured out the most effecient ways to update records in the environment
- Learned how to work alongside people, even if we were working on different things
- Gained intrest in automating data entry jobs

April 13 - Current Junior Engineer, Kenect - Working on the AI platform team, finding best ways to implement ML's and LLM's in the current product - Working part time as I graduate, then full time when I do - Working closely with a team, helping where I can
